The following is an examiner's statement of reasons for allowance: Claim 11 is allowable because the prior art does not teach or fairly suggest a sample chip analyzing device that comprises a waveguide having probes, to which samples are coupled, are fixed directly on the surface of the waveguide, along with the fluorescent substance labeled on the samples being coupled to the probe is excited by an evanescent wave generated when the waveguide plate wave guides the fluorescent excitation light from the light source to the interior of the waveguide plate and entirely reflects the fluorescent excitation light. All depending claims are allowable.
